

Pro Tracker-8: Device Wired Installation

1. Getting Started

- Most wiring installations are connected under the dash, console, or fuse box.

2. Wired Installation

- Take the end with open wires and splice them as follows:
 - Red Wire — 12V Constant Power
 - White Wire — 12V Ignition Switch
 - Black Wire — Chassis Ground

3. Wire Management

- Run the wires to the preferred storage location, directly under or behind the vehicle's dashboard
- Secure the cables to ensure safe vehicle and device operation

4. Device Installation

- For optimal device performance, an unobstructed view of the sky is preferred
- Device storage options:
 - Tucked inside of the vehicle's dashboard
 - Mounted or taped to the inside of the windshield with double-sided tape

6. Verify Device Installation

- Wait for the 2 LEDs to start a single blink sequence on the Pro Hardwire Tracker Device
 - Blue LED — Cellular service
 - Red LED — GPS service

7. Look — You're On The Map!

- Log-in to RazorTracking.net or open your app and start tracking!

Questions & Troubleshooting

- Call (833) GORAZOR, and select option 2, or visit our Help Center by clicking the ⓘ icon in the right panel once logged into Razor Tracking
