

Agvance and Razor Tracking

introduce a seamless integration to deliver real-time fleet visibility for agribusiness. Agvance customers can now view directly within the maps of Agvance SKY Dispatch and Agvance Ops software the location of Razor Tracking-equipped vehicles.

It gives them **full operational visibility** with live telematics data. This integration strengthens the connection between logistics, equipment, and agribusiness planning, delivering a clean, efficient, and unified experience for Agvance users.

AGVANCE RECOMMENDED TO REMOTELY MONITOR SUPPORT VEHICLES
